## DETAILED ACTION

### *Claim Objections*

1. Claims 22-29 are objected to because of the following informalities: in line 1 of claims 22 and 25-28, "claim 1" should be "claim 21"; in line 1 of claims 23-24, "claim 2" should be "claim 22"; and in claim 29, line 1, "claim 8" should be "claim 28". Appropriate correction is required.

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 31 is rejected under the judicially created doctrine of double patenting over claim 28 of U. S. Patent No. 6,643,322 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: although claim 31 of the instant application includes the additional word "continuously" determining a measure of errors occurring in

communication over a wireless link over claim 28 of U. S. Patent No. 6,643,322. It is obvious to a person skill in the art that additional correction (continuously) is necessary if the measurement of errors has not been completely corrected.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

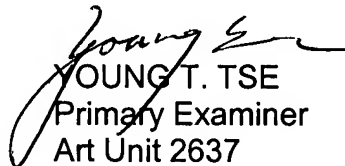

***Allowable Subject Matter***

4. Claims 1-9, 11-19 and 21 are allowed.
5. Claims 22-29 would be allowable if rewritten or amended to overcome the objections set forth in this Office action.
6. Claim 31 would be allowable if submit a terminal disclaimer to overcome the double patenting set forth in this Office action.
7. The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to show or suggest a method or apparatus that dynamically adapts plural set of wireless link parameters, wherein each set of wireless link parameters corresponds to a relationship between throughput efficiency and error rate and a plurality of predetermined thresholds is used to correspond to intersection of the relationship for different set of wireless link parameters.
